

Conditions concerning transport, storage and general principles concerning handling the galvanized, aluzinc and coated sheets

- Vehicle used for transport should have body of length adapted to the length of the sheets. Anti-corrosion coating on the sheets, which are not tightly fixed to the vehicle body and provided in bundles extending beyond the body, can be scratched.
- The galvanized, aluzinc and coated sheets must be protected against wetting.
- Manual unloading and possible loading should be performed by adequate number of people so that not to deform the profiled sheets, e.g. 6 meter long sheets must be handled by 6 persons. Sliding the sheets one on another or on any surface may damage the anti-corrosion coating.
- Orders concerning profiled sheets, wherein at least one item exceeds the maximum length specified for a given profile, are not covered by a guarantee, and the Producer and seller are not held responsible for any transport damages.
- The sheets should be stored in factory packages not longer than 3 weeks since the production date. Upon expiry of this period, cut the package open, remove the protective foil – if any – and insert thin spacer between the sheets.
- Sheet stored in packages and rolls for the period exceeding 3 weeks cannot be kept outdoors or inside premises endangered to humidity and temperature variations as well as near aggressive materials. Optimum storage temperature is 15–30°C. Distance of a package or roll from the surface must be min. 20 cm. Improper storage conditions may lead to water steam condensation between the sheets or turns and chafing on anti-corrosion coatings.
- Total storage time cannot exceed 5 months since the production date.
- Any defects of the product that can be identified before installation of processing should be immediately reported to the Producer. In case a client uses or installs product with a previously identified defect, Producer is not responsible for such defect.
- In case of doubts as to the storage method, contact us to get professional guidance. Phone No.: +48 124 155 551.
